## REPORT OF Superintending School Committee.

---

TO THE CITIZENS OF BUCKSPORT:—

The close of another municipal year finds our schools in very much the same condition as they were, when our last report was made, except that in some parts of the town we find decided improvement, both in the schools, themselves, and in the efforts of the parents to increase the usefulness of the teachers; while on the other hand, one or two of the schools have been failures.

### FINANCES.

At our regular meeting in March, 1887, it was voted to raise the "usual amount" of money to defray the school expenses for the then ensuing year. This amount, \$2500.00 increased by the amount granted by the State, gave the town a total of \$4,051.10, for school purposes.

At first glance, we may think this is a large amount to expend on our schools, but when we consider the fact, that an education is nearly, if not quite all that many of us can give to our children, and that such education gives to them an unquestioned advantage over those who have it not, and that in this way, we can give to them legacies, which will last while life and reason exist, then, the amount which we are called upon to contribute as individuals sinks into insignificance, and certainly in our town is not sufficient to satisfy the demand upon it.

On account of the great decrease in the number of scholars, and the consequent decrease in State aid at least \$1,000 additional, is required to place our school fund in as good a condition as it was a few years ago. Can we not reduce expenditures in some other direction, and increase our school fund.

### DISTRICTS.

Our laws provide for the apportionment of the school fund to the several districts according to the number of scholars in such districts. According to the apportionment of 1887, each district received \$4.66 for each scholar within its limits. This method we see at a glance places the small districts at a great disadvantage. In this way a district containing twenty scholars would receive \$93.20, which would provide a school of only eleven weeks in the year, after deducting amounts necessary for repairs, fuel, etc, while a district containing fifty scholars, taught by one teacher, the same as in the small district, receives \$233.00, or enough for thirty weeks at the same rate. Surely the thickly settled districts have none *too much* school, but the small districts have too little school. Can we not devise some method of aiding the *small districts*?

The following table shows the amount apportioned to each district and the number of weeks of school in each so far as returns have been made to us.

## TEACHERS.

"As is the teacher so is the school" is a proverb which the experience of every parent and every committee has proved true and certainly if it is true. enough can not be said against the employment of third rate school teachers. A poor teacher is a positive *injury* to a school as *some* within the limits of this town can testify.

Would any of you care to have a good colt of yours placed in the hands of a man who knew nothing of handling such an animal, simply for him to experiment on and see what he could make of him? Would you not rather say, "This colt is too valuable to admit of any trifling, I will get a man who knows his business, to handle him." And yet here are our boys and girls with minds bright and clear and with ambitions which need to be encouraged and which can be encouraged by an ambitious teacher, and are we not subjecting them to this same experience? Are there not men and women placed in our schools who know vastly less about the training of our bright girls and boys than they do about handling the valuable colt?

Certain it is that a superior teacher who has spent a large amount of time and money in fitting himself for the position of teacher, will not work for inferior wages. They are entitled to fair compensation which our agents, limited by so small an amount of school money feel that they can not afford to pay, and in consequence hire those who either are inexperienced, or who have tried to teach and can't do it, and who are willing to work for what they can get. Two remedies suggest themselves. First, let us raise more school money. Second, at your coming school meeting instruct your agent to hire a reliable, experienced teacher at any cost.

## SCHOOL BUILDINGS.

In regard to our school houses, it may be said that some are fairly good, others bad, while some are wholly unfit for occupation. We are certain that a number of the districts will take steps toward repairing them the coming year, and give our boys and girls an impulse to attend school more regularly. The blackboards in nearly all the school houses need repairing and painting and we earnestly hope agents will attend to this matter. Our schools also need maps, or globes are better. These can be obtained at slight expense and will last for years. Let us not expect *too* good work from our teachers unless we give them *tools* to work with.

## FREE HIGH SCHOOL.

By a contract between District No. 1 and the E. M. C. Seminary, graduates of the Grammar School may attend the Seminary as a Free High School. By the State law, any scholar in the town, passing the required examination, may receive the same privilege, by paying to the agent of District No. 1, such an amount as the district pays to that institution for a resident scholar.

In conclusion we desire to make a few suggestions to the parents of these boys and girls who are so soon to take the places we now occupy in life and to become the men and women of the town. Let us remember that the stations they are to take in life are to depend largely, very largely on the counsels which we shall give to them. Let us not forget that while success may depend largely on educational development, there are other qualifications which are no less essential to that success. There are ambitions that may be waiting even now for us to arouse; there may be powers unknown even to themselves, that may be lying idle for us to bring out. There may be the gold and the silver hidden away in the depths of their minds, waiting for us to discover. Let us then assume these responsibilities, and as encouragements may be needed in order for them to obtain an education which shall make them yet more powerful in their influences let us not withhold the needed word. As ambitions may need stimulating that they may take the destined station, let us not keep back that which may result in a blessing to many a life in the years to come.

MR. MODERATOR :

My wife says it's strange a man will waste Ten Cents to buy a piece of Tobacco, that will last but a few days, when the same amount, invested in *Swedish Stove Polish*, will keep all the stoves in the house like mirrors for months. The only way I can keep peace in the family, and at the same time a piece of Tobacco in my pocket, is to supply liberally with the *Swedish*, and then I can *Smoke "Sambo,"* and chew Toney, and there's no fault found.

# THE CELEBRATED MOXIE

*Contains not a drop of Medicine, Poison,  
Stimulant or Alcohol,*

But is a simple sugar-cane-like plant, grown near the Equator and farther south, was lately accidentally discovered by Lieut. Moxie, and has proved itself to be the only harmless and effective nerve food known that can recover brain and nervous exhaustion; loss of manhood; imbecility and helplessness. It has recovered paralysis, softening of the brain, locomotor ataxia, and insanity caused by nervous exhaustion. It gives a durable, solid strength, and makes you eat voraciously, takes away the tired, sleepy, lifeless feeling like magic, removes the fatigue from mental and physical overwork, at once, will not interfere with the action of vegetable medicines.

**DOSE, ONE OUNCE EACH FOUR HOURS.**

The loss of gas from the bottle does not weaken or injure the Moxie. Look out for counterfeits.
